DANISH STYLE

Current Designs partnered with Danish kayak designer Jesper Kromann-Andersen to produce a series of "Danish Designed Current Designs Kayaks". This incubating family will be most noticed for its snug fit and sporty dimensions. Don't let the dimensions deceive you, these kayaks accommodate a myriad of paddler shapes, sizes and skills. The hull designs are a marriage of classic hulls with new innovative twists leading to highly improved functionality and new levels of excitement. Being true to his Danish heritage, functionality in designs isn't enough for Jesper; the decks are ultra-stylish and functional bringing a new level of sophistication to the kayaking world. The Prana is the first release in the Danish Designed Current Designs family. Stay tuned in the years to come!

Prana

Maximum Load: 250 lbs

NEW!

A collaborative effort between Danish designer Jesper Kromann-Andersen and Current Designs' award-winning team, the new Prana touring kayak is as much at home in surf and rock gardening as it is crossing a mirror-like bay. Available in fiberglass and Kevlar layups, the Prana is a quick and highly maneuverable kayak, with an efficient shape that chews through the miles. The hull is more stable than its svelte 21-inch beam would lead you to expect, while a hybrid hard chine and tracking-friendly rocker profile makes this 17-foot touring kayak perfect for all conditions. The Prana is standard with both fore and aft day hatches, fore and aft large hatches and a full complement of safety and comfort.
